Sexual Assault: Virtual Training Takes Responders from the Exam Room to the Courtroom

www.safeta.org/practicum

The SAFE Virtual Practicum is a new, interactive multimedia program for medical and criminal justice professionals who work with sexual assault victims.

The program covers:

- How to perform an effective medical forensic examination in sexual assault cases.
- How to address patient concerns.
- How to minimize trauma while increasing the likelihood that evidence collected during the exam will help in the investigation and lead to a successful prosecution.

This sexual assault medical forensic examination virtual training was funded by two components within the United States Department of Justice: the Office on Violence Against Women and the Office of Justice Program’s National Institute of Justice.
