

Please describe your profession as it relates to homeland security.

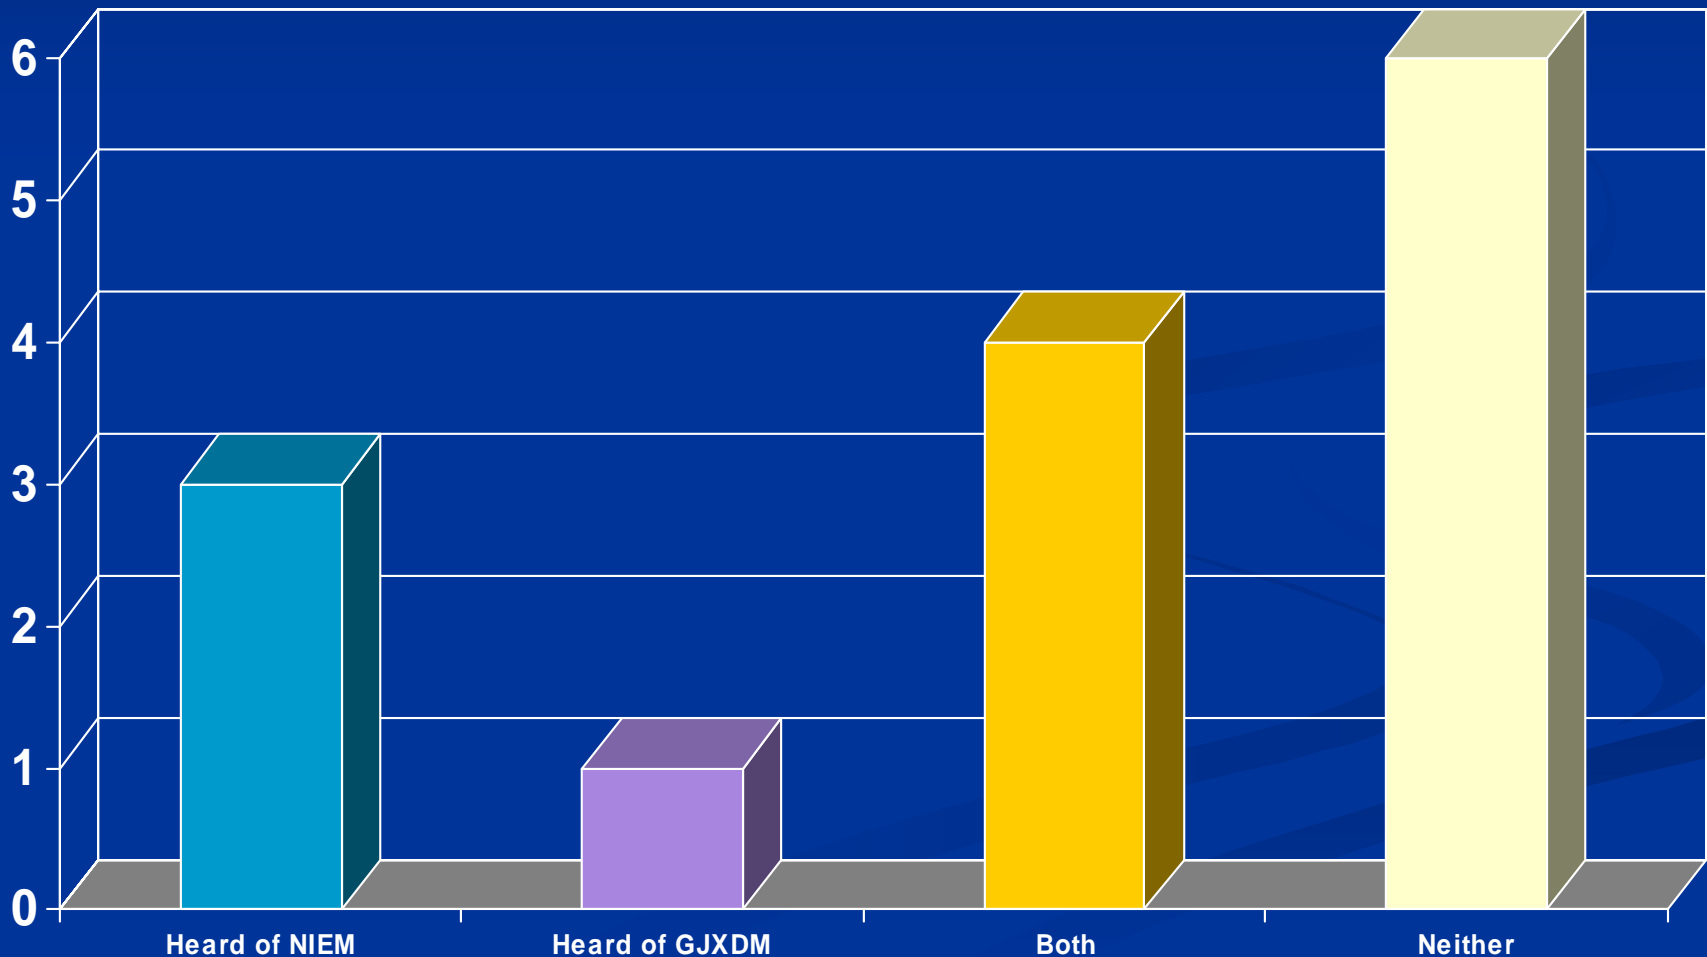

The biggest challenge in terrorism information sharing and collaboration is:

Had you heard of the Information Sharing Environment (ISE) or the Program Manager (PM-ISE) before this web cast?

Have you heard about the Global Justice XML Data Model (GJXDM) or the National Information Exchange Model (NIEM) prior to this event?

Do you or your organization need to build reusable and/or cross domain information exchanges?
